

team8_data_spring-petclinic

Introduction

This file includes all our findings from an in-depth look at the spring-petclinic project. There will be images as well as short youtube videos that we used to explain what the issues were and how we reported them. This document focuses only on new bugs that were discovered. Any old bugs that were found were omitted, however they can be seen on the github repository in the link below.

Bug 1 (new)

[New Bug1](#)

[New Bug1 Fix](#)

Bug 2 (new)

[New Bug2 NullPointerException](#)

Bug 3 (new)

[NewBug3 Video](#)

The screenshot shows a GitHub pull request interface. At the top, the title is "Duplicate pet name issue fixed #1290". Below the title, there's a status bar indicating "Closed" and "4313testing wants to merge 2 commits into spring-projects:main from 4313testing:duplicate_pet_name_issue". The main content area shows a commit history with two commits: "adding_pet_name_validation_on_edit_Pet" and "applying spring -javaformat". The commit "adding_pet_name_validation_on_edit_Pet" is highlighted with a green box. To the right of the commit history, there's a sidebar with sections for "Reviewers" (No reviews), "Assignees" (No one assigned), "Labels" (None yet), "Projects" (None yet), "Milestone" (No milestone), and "Development" (Successfully merging this pull request may close these issues.). At the bottom, there's a comment from "dsyer" stating "Merged in 3a61275".
